

TWINSTAR
CO2 DIFFUSER.

**MESH SIZE 15.3um.
THE SMALLEST SIZE.**

It has the lowest hole size among aquarium diffusers. The fine bubbles generated at low mesh sizes quickly and effectively raise the appropriate concentration in the aquarium with a small amount of carbon dioxide.

HANDMADE DIFFUSER.

It goes through 10 processes to a TWINSTAR DIFFUSER.
For the best quality, all are made by hand.

TWINSTAR QUALITY.

Like every TWINSTAR-designed case, it undergoes thousands of hours of testing throughout the design and manufacturing process. So not only it does look great, but it's was also built to protect your diffuser from scratches.

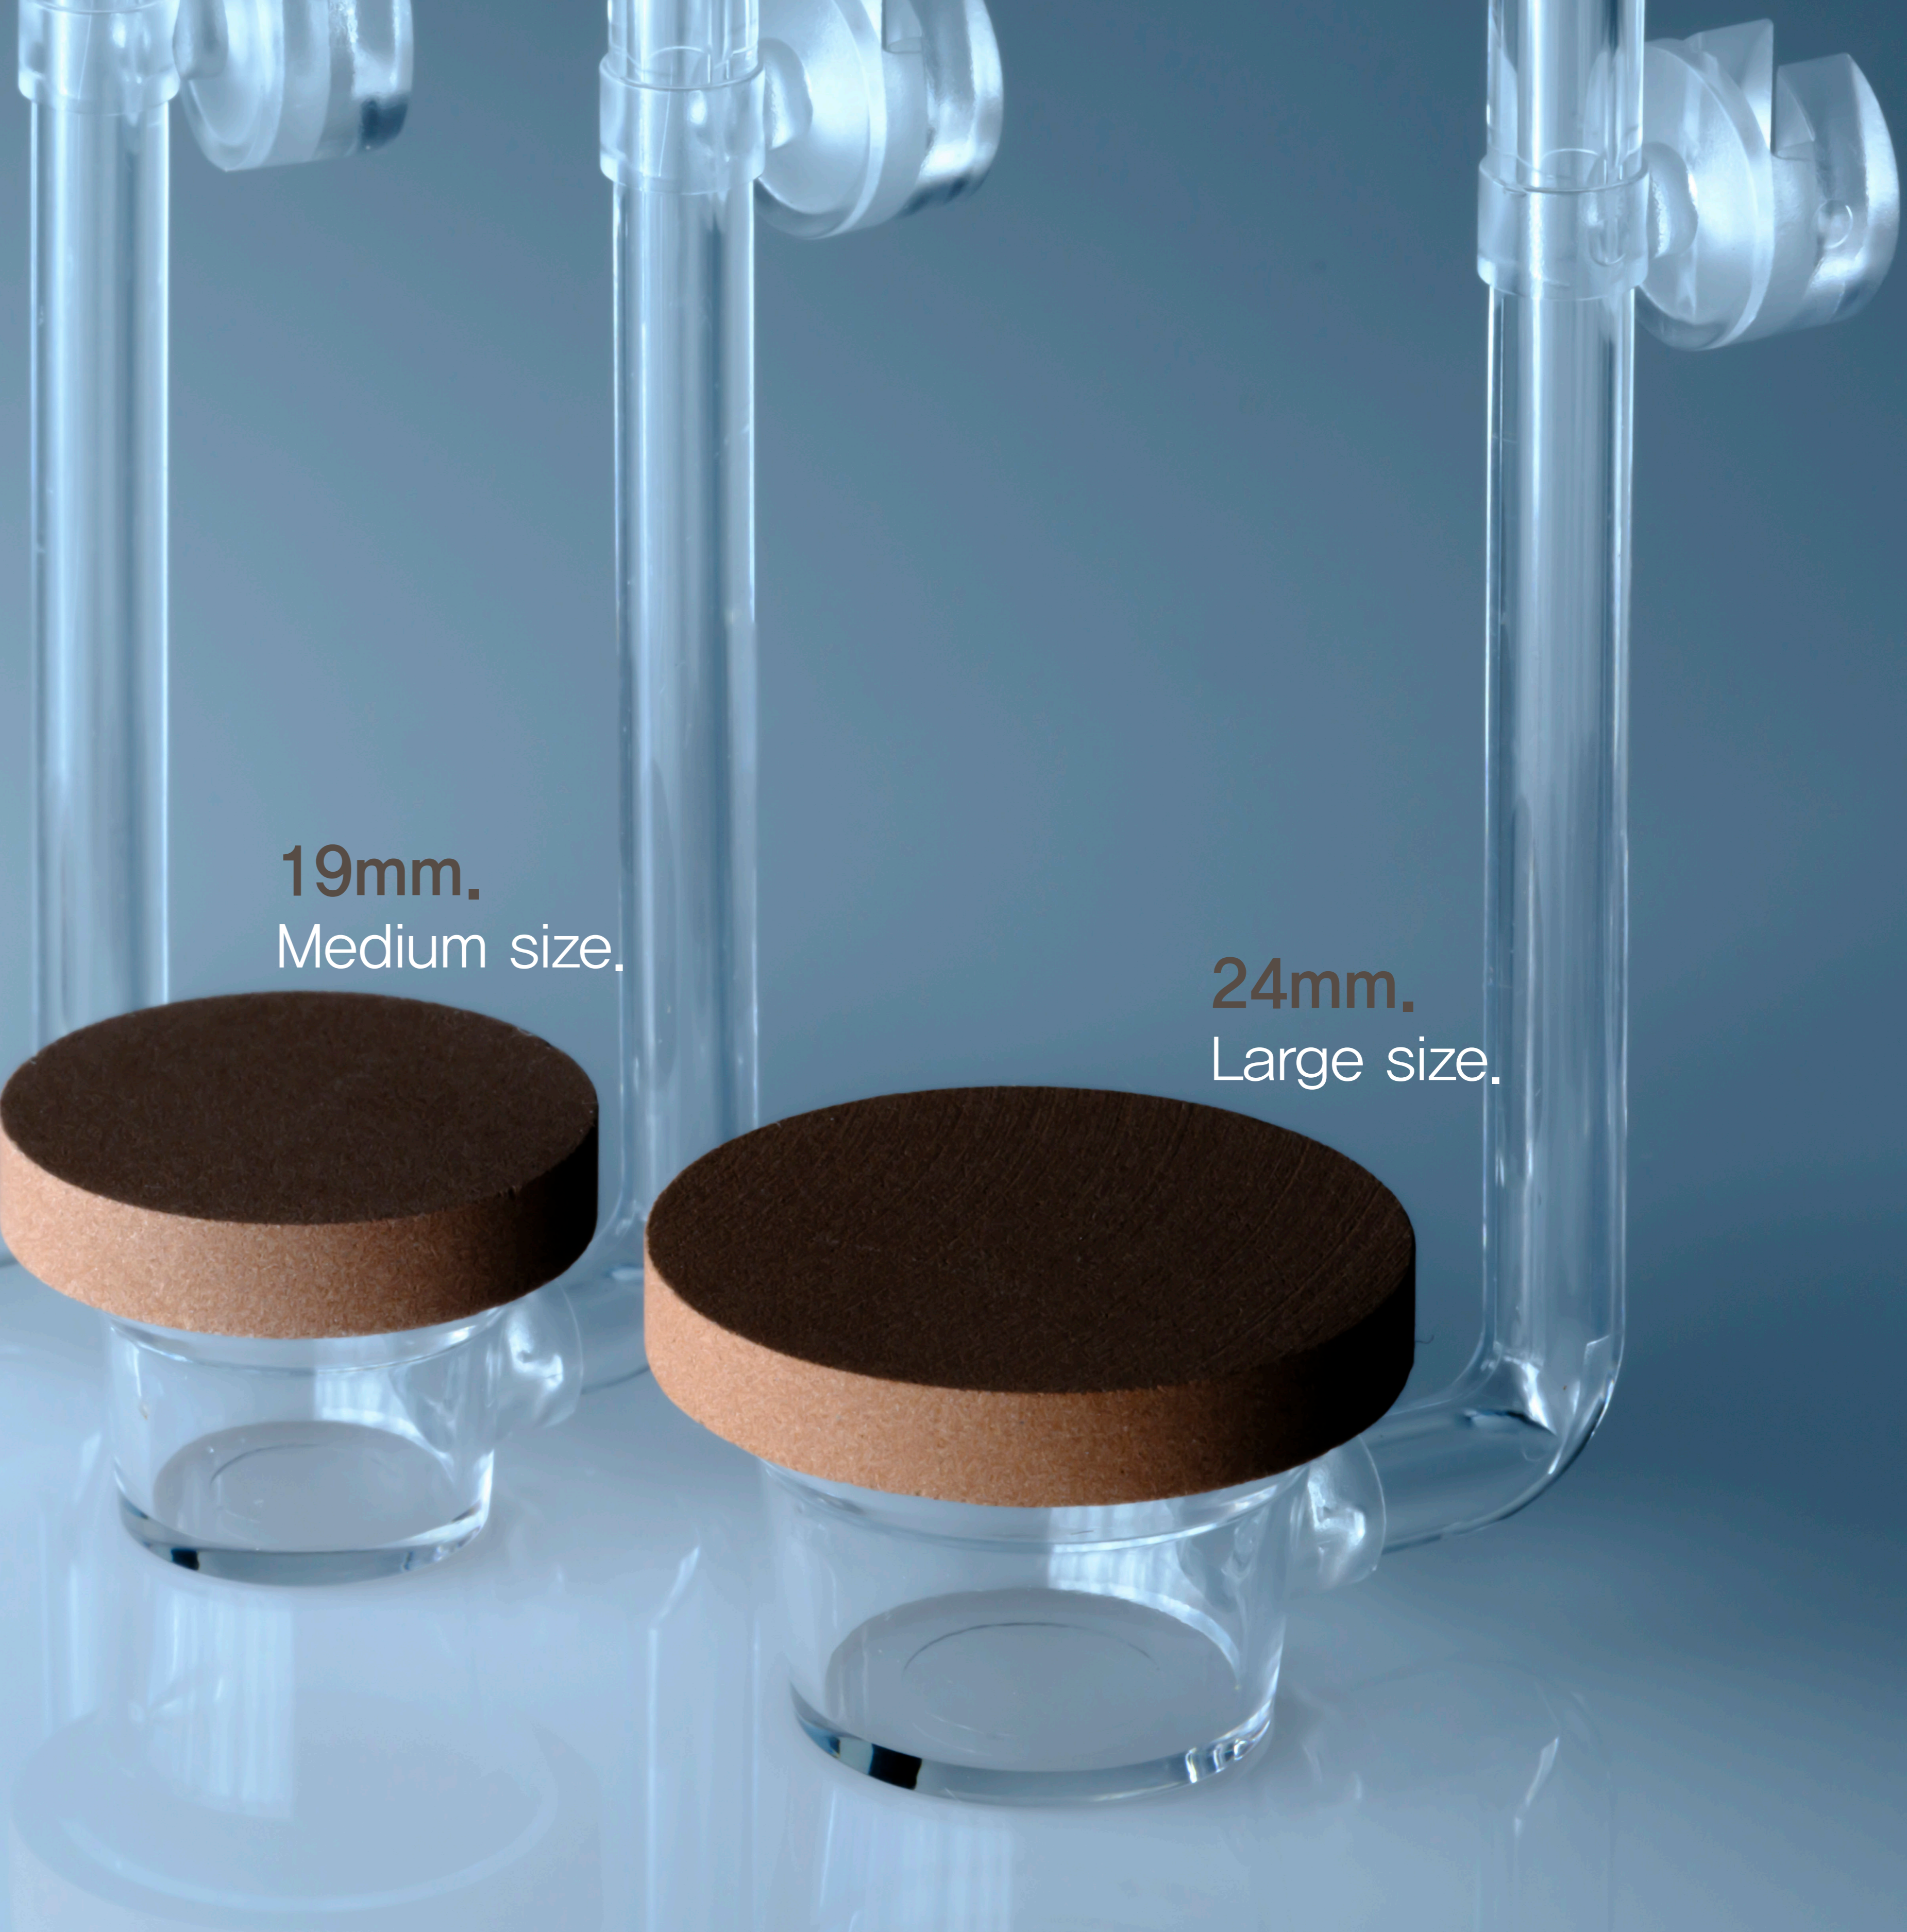

15mm.
Small size.

19mm.
Medium size.

24mm.
Large size.

A clear glass diffuser is shown on the left side of the frame, releasing a fine mist of small, white bubbles into an aquarium. The bubbles are captured in mid-air, creating a soft, ethereal glow. The background is filled with lush green aquatic plants, some with long, thin leaves and others with small, rounded leaves. The lighting is bright and natural, highlighting the texture of the plants and the clarity of the water.

**TWINSTAR DIFFUSER.
THE SMALLEST CO2 BUBBLE.**

**TWINSTAR CO2 DIFFUSER FOR
COLOR. GROWTH. PHOTOSYNTHESIS.**
